

The day had arrived my noizecore badge of honor the legendary DS2US new cd is in Blackest Noizecore Satan this is the follow up album to one of the most Satanic metal album I have herd in so long. I call up my budz from Harsh Noise page on Facebook Love the wall of noise created by all those noise music artist. My Fave is this heavey one man improv experimental post apocalyptic dystopic Luciferian Star, he makes disks from high up in the mountains isolated from a world that The Reverend Steve of DS2US comments on in both interpretive sound metal punk noizecore cyberpunk experimental waist-land music.

Satan has spoke through sound eerie tones in horror movies, a sub base sine wave that makes the hair on your arm stand up. The devil has been a scape goat for many years. Sound carries for many light years across Galaxy

Satanic electromagnetic spectrum from 3 Hz through 60 Hz, and appear as distinct peaks at extremely low frequencies (ELF) around 7.83 Hz (fundamental), 14.3, 20.8, 27.3 and 33.8 Hz

Satan's Earthships resonance has been a natural and constant frequency of planet Earth, pulsating exactly at 7.83 Hz for thousands of years. For the ancient Indians, this number had a special meaning, it was also considered the sacred and cosmic sound in the Hindu religion. Satan as all beings use sound and resonance to influence other beings matter and wills. The Om sound is the primordial sound, and is called the Shabda-Brahman Satan chants Om then drops the pitch to hell, Inferno (pronounced [im'fɛrno]; Italian for "Hell") is the first part of Italian writer Dante Alighieri's 14th-century epic poem Divine Comedy.

If you've ever studied any music theory or are just given to reading about music, you've probably heard of the tritone — it's an interval that's three whole tones apart, and its dissonance means that it sounds sinister as hell. It was dubbed diabolus in musica (the devil in music), and its use has historically been frowned upon in liturgical music, which generally relies on unison and harmony. Satan gifted us the tritone and it was banned by the Catholic Church.) All this, of course, means that using it in your songs carries a certain inherent badassness and makes very Satanic music sounds or frequencies.

dim seventh example of the devil's tritone.

Satan has been pleased for decades with the sounds from DS2US circuit bent toys heavy synths minimal or modified he makes the noise that makes Satan smile. So the big deal with this release is it's a tape old school.

I must take this to mu budz this is harsh noize at its best I just know it. I phoned a satanist buddy of mine.” shem hem forosh , hail satan” “hay just got the new DS2US tapes I am on my way shem hem, yea yea hail satan”

Shem HaMephorash (Hebrew: שם המפורש, alternatively Shem ha-Mephorash or Schemhamphoras), meaning the explicit name, is an originally Tannaitic term describing a hidden name of God in Kabbalah (including Christian and Hermetic variants), and Satanism, It is composed of either 4, 12, 22, 42, or 72 letters (or triads of letters), the last version being the most common.

666 is popularly known to be the number of the beast, for the number finds mention in The Book Of Revelations. The Book of revelations, apparently, is the last of the Christin holy scriptures. There are many facts about the number 666 that will intrigue you. One of such interesting facts

about 666 is that the number finds mention in the 13th chapter of the book of Revelation. As we are aware, the number 13 has a distinct significance as far as Christian religion. It is believed, according the 13th Chapter of the book of revelation, that a political power inclined towards religion will bring an end to the people of God and bring forth the realm of satan. 666 is the sum obtained by adding the first 36 natural numbers in the number system.

. President Richard Nixon used the telephone that had the number 666-66666 to contact Astronauts during the 1969 Apollo landing.

the Movie, Omen 666 was released globally on 6.6.06.

The pentagram is geometrically composed of five A's. Though no further meanings were placed on this symbol by the greeks, Certain symbols did become connected with Greek letter shapes or positions, Such as Gammadion which is the Alpha and the Omega.

A “point down” pentacle is nothing new- nor is it necessarily Satanic when it appears as such. Historical depictions of the pentagram were as likely to be points down as point up. A distinction between one or the other was rarely made by the ancients. Even today, one must not assume a point down pentagram is Satanic, as it is just likely to be Masonic, Wiccan, or simply upside-down. Some inexperienced Wiccans will occasionally claim that a point down pentacle is Satanic, but such a symbol has at times represented the Wiccan horned God, and is still today an emblem of the Second Degree initiation in Gardnerian Wicca The Satanic Pentagram

In the minds of many, the pentagram is inextricably linked with black magick and Satan worship. The Satanic pentagram is a difficult symbol- it is the newest and least used, but at the same time the best known and most controversial. The Satanic pentacle is almost always presented upside down, or inverted, with a single point facing downward, and it is this pentacle that is presented incorrectly as ‘evil.’

The adoption of the pentacle as a Satanic emblem is quite recent, dating only to the latter half of the twentieth century. To the Satanist, this glyph is a representation of “Black magic,” symbolizing the triumph of matter and individual desires over religious dogma- earth over an illusory promise of

heaven. It is not analogous to the upturned cross (which is a symbol of rebellion against Christian culture), and is not “anti-Wiccan.”

In modern Satanic theology, the pentagram is far more likely to represent the individual, or the choice to pursue individual glory or immortality rather than union or absorption with the divine- where some traditions advocate the sublimation of the ego or submission to god, Satanism exalts and glorifies it, deifying the human being. The symbol most commonly associated with Satanic practices is the “Sabbatic goat” or Goat of Mendes pentacle, often confused with Baphomet, a figure from Templar legend, and Pan, the Greek goat God. It rarely has any deeper meaning; an irony when one considers that its association with Satanism has made the pentagram a feared symbol to many, and the subject of countless conspiracy theories.

### The Goat's Head

The goat itself is related to medieval superstitions about the behavior of witches, who were often depicted dancing with or riding on goats (who often represented Satan himself). The goat in that context is often seen as an ironic symbol of sexual repression (the association being a clear allusion to the unrestrained sexuality represented by this ancient fertility symbol), so one can see why the symbolism might appeal to modern Satanists, as a symbol of freedom from sexual and religious taboos.

The word ‘swastika’ is a Sanskrit word (‘svastika’) meaning ‘It is’, ‘Well Being’, ‘Good Existence, and ‘Good Luck’. However, it is also known by different names in different countries - like ‘Wan’ in China, ‘Manji’ in Japan, ‘Fylfot’ in England, ‘Hakenkreuz’ in Germany and ‘Tetraskelion’ or ‘Tetragammadion’ in Greece. The earliest swastika ever found was uncovered in Mezine, Ukraine, carved on an ivory figurine which dates back an incredible 12,000 years. One of the earliest cultures that are known to have used the Swastika was a Neolithic culture in Southern Europe.
